Research Summary

Keratin is a fibrous structural protein that serves as a key component in the composition of hair, nails, feathers, and the outer layer of the skin. It is a protective and durable protein, known for its strength and resilience. In the context of hair care, keratin is often used in products such as shampoos, conditioners, and treatments to enhance the strength and texture of hair. These products aim to replenish and strengthen the natural keratin content, particularly in hair that has been damaged or subjected to environmental stressors. The use of keratin in hair care is believed to contribute to smoother, shinier, and more manageable hair. Additionally, keratin treatments, also known as Brazilian blowouts, involve applying a keratin solution to the hair to reduce frizz and straighten curls. The application of keratin in beauty and cosmetic products underscores its role in promoting the health and appearance of hair and nails.

The major global manufacturers of Keratin include BASF, TRI-K Industries, Seiwa Kasei, Akola Chemicals, Roxlor Group, TNJ, NutriScience, BCF Life Sciences, Keraplast, Huzhou Zhenlu, etc. The global players competition landscape in this report is divided into three tiers.
