Research Summary

Laccase is an enzyme belonging to the oxidoreductase class, specifically a multicopper oxidase, that catalyzes the oxidation of a variety of substrates by reducing molecular oxygen to water. It is widely distributed in nature and is found in fungi, plants, and bacteria. Laccases play a significant role in various biological processes, including lignin degradation, pigment formation, and pathogenesis. In industrial applications, laccases are utilized for their ability to oxidize phenolic compounds, making them valuable in processes like bioremediation, wastewater treatment, and the synthesis of valuable chemicals. The enzyme has gained attention for its eco-friendly and versatile applications, contributing to advancements in both environmental and industrial biotechnology.

The major global manufacturers of Laccase include Novozymes, DuPont, Amano Enzyme, Yiduoli, Sunson, Denykem, etc. The global players competition landscape in this report is divided into three tiers.
