Research Summary

Leather release paper is a specialized type of paper used in the production of synthetic and genuine leather to impart texture, gloss, and patterns to the leather surface during the finishing process. It is typically coated with a heat-resistant and non-stick layer that allows it to transfer intricate designs, textures, or finishes onto the leather when pressed under heat and pressure. Leather release paper is widely used in the manufacturing of automotive upholstery, footwear, furniture, and fashion accessories to achieve consistent surface quality and aesthetic appeal. After the transfer process, the paper is easily peeled off without leaving residue, ensuring a smooth and refined leather surface.
