Research Summary

LED bulb parts and LED light parts refer to the individual components that make up an LED (Light Emitting Diode) lighting system. Key components include the LED chip, which is the core part that emits light when an electric current passes through it, and the heat sink, which helps dissipate the heat generated by the chip to prevent overheating and ensure longevity. The driver is another crucial part, as it regulates the electrical current supplied to the LED, converting AC power to the necessary DC voltage. Additionally, the lens or diffuser is used to direct or scatter the light for even distribution, and the housing or casing provides structural support and protection. Other parts might include the circuit board, electrical connections, and sometimes a reflector or diffuser to enhance light output and quality. Together, these parts ensure the efficient operation, durability, and performance of LED bulbs and lights.

The major global manufacturers of LED Bulb Parts and LED Light Parts include Signify, Mean Well, Inventronics (Hangzhou), Inc, Shenzhen SOSEN Electronics, Delta
