Research Summary

A LED radar speed screen is a traffic management device designed to enhance road safety by displaying real-time vehicle speeds to drivers using a radar sensor and a LED screen. These screens detect the speed of oncoming vehicles and show the measured speed prominently, often accompanied by visual cues like color changes, flashing lights, or text prompts to encourage drivers to slow down if they are exceeding the speed limit. LED radar speed screens are commonly installed in school zones, residential areas, construction zones, and other locations where speed control is critical.
