Research Summary

Levothyroxine Sodium API (Active Pharmaceutical Ingredient) is the synthetic form of the thyroid hormone thyroxine (T4), which is naturally produced by the thyroid gland. It is used primarily in the treatment of hypothyroidism, a condition where the thyroid does not produce enough thyroid hormone. Levothyroxine Sodium works by replacing or supplementing the hormone levels, thereby normalizing the body's metabolic processes and energy levels. The API is the key active component in medications such as tablets, capsules, and injectable solutions prescribed to patients with thyroid hormone deficiency. Levothyroxine Sodium is carefully manufactured and regulated to ensure consistent potency, purity, and bioavailability, which are crucial for effective thyroid hormone replacement therapy. Accurate dosing and monitoring are essential to avoid complications such as hyperthyroidism or cardiovascular issues, making the quality of the Levothyroxine Sodium API vital for patient health and treatment efficacy.

The major global manufacturers of Levothyroxine Sodium API include Novartis, Azico Biophore India, Excella GmbH & Co., Peptido GmbH, China Associate Pharma, etc.
