Research Summary

Li-ion battery e-bikes, also known as electric bikes, are bicycles equipped with a lithium-ion battery that powers an electric motor. These bikes allow riders to pedal as they would on a traditional bicycle, but also provide the option to use electric assistance to make pedaling easier.

The Li-ion battery is the source of energy for the electric motor, and can typically provide a range of between 20 and 60 miles per charge, depending on the type and model of the e-bike. The battery can be recharged using a standard outlet, and usually takes between 2 and 6 hours to fully recharge.
