Research Summary

A lightweight steel frame is a type of building framing system that uses lightweight steel members instead of traditional wood or concrete materials. These frames are made of thin-gauge steel and are designed to be strong, durable, and resistant to fire, water, and pests. Lightweight steel frame construction is well-suited for residential, commercial, and industrial buildings, as it provides a strong and durable structure that can withstand even the most extreme weather events. Additionally, because of their lightweight nature, these frames are easy to handle and assemble, making construction quicker and more efficient. Lightweight steel frame construction is a cost-effective and sustainable building solution that is gaining popularity in the construction industry.

The major global manufacturers of Lightweight Steel Frame include Metek UK, Hadley Group, Emirates Building Systems, Intelligent Steel Solutions Ltd, FRAMECAD, Genesis Manazil Steel Framing, Steel HQ, Steel Frame Solutions, QSI Interiors, MRI Steel Framing, Arkitech Advanced Construction Technologies, Keymark Enterprises, Aegis Metal Framing, Stowell Company, Craco Manufacturing, KL Steel, etc. The global players competition landscape in this report is divided into three tiers.
