Research Summary

Liquid polybutadiene is a type of polymer derived from butadiene, a monomer with two carbon-carbon double bonds. It is characterized by its liquid form at room temperature and can be either a low-molecular-weight liquid or a high-molecular-weight viscous liquid, depending on its specific composition and processing. Liquid polybutadiene is commonly used as a base material in various industrial applications, including adhesives, sealants, coatings, and elastomers. Its unique properties, such as flexibility, toughness, and chemical resistance, make it suitable for a wide range of applications where durability and performance are required. Additionally, liquid polybutadiene can be modified or formulated with additives to tailor its properties for specific end uses, making it a versatile material in the polymer industry.

The major global manufacturers of Liquid Polybutadiene include Kuraray, SIBUR International, Idemitsu Kosan, Versalis, Evonik Industries, Cray Valley, Nippon Soda, etc. The global players competition landscape in this report is divided into three tiers.
