### Research Summary

Lithium metal is a soft, silver-white alkali metal and a chemical element with the atomic number 3. It is the lightest metal and has the highest electrochemical potential, making it an essential component in the production of rechargeable lithium-ion batteries. Lithium metal exhibits excellent energy storage properties due to its low atomic weight and ability to release and accept electrons during the charging and discharging process. However, lithium metal is highly reactive and can spontaneously ignite or react with moisture and air, necessitating careful handling and storage procedures. Its unique properties and high energy density make it a crucial material for various applications, including portable electronics, electric vehicles, and renewable energy storage systems.

The major global manufacturers of Lithium Metal include Albemarle, GanFeng, SQM, Tianqi Lithium, Livent, Chengxin Lithium, Nanshi Group, Sichuan Yahua Industrial, QingHai Salt Lake Industry, General Lithium, Jiangxi Special Electric Motor, etc. The global players competition landscape in this report is divided into three tiers.
