Research Summary

An LNG ISO Tank Container refers to a specialized shipping container designed specifically for the transportation of liquefied natural gas (LNG). These containers are built to international standards outlined by the International Organization for Standardization (ISO) and are typically constructed with high-strength steel to ensure safety and durability. LNG ISO Tank Containers have a cylindrical shape and are heavily insulated to maintain the extremely low temperatures required to keep LNG in its liquid state. They are equipped with various safety features, such as pressure relief valves and emergency shutdown systems, to prevent any accidents or leaks during transportation. These containers have revolutionized the LNG industry by offering a flexible and efficient means of transporting LNG across long distances, both by sea and land, enabling access to remote areas and enhancing the global trade of natural gas.

The major global manufacturers of LNG ISO Tank Container include CIMC, BTCE, Chart Industries, FURUISE, Bewellcn Shanghai, Air Water Plant & Engineering, Rootselaar Group, Cryeng Group, Uralcryomash, Corban Energy Group, M1
