### Research Summary

Magnesium fireproof board, also known as magnesium oxide board or MgO board, is a building material that offers exceptional fire-resistant properties. It is composed of magnesium oxide (MgO) and other minerals that are bonded together with a polymer or fiber mesh. This results in a strong, durable, and non-combustible board that can withstand high temperatures without deteriorating or releasing toxic gases. Magnesium fireproof board is commonly used in construction and interior applications where fire resistance is a crucial requirement, such as walls, ceilings, and flooring. It is also resistant to moisture, mold, and mildew, making it suitable for areas with high humidity or prone to water exposure. In addition, the board is lightweight and easy to work with, allowing for easier installation and reducing construction time and costs. Its fireproof properties, along with its other advantages, make magnesium fireproof board a popular choice for enhancing safety in buildings and structures.

The major global manufacturers of Magnesium Fireproof Board include Mago BP, Framacad, Magnastruct, MGO Board, Yunion, Hocreboard, Trusus, Huacheng, Yulong,
