Research Summary

A magnetic separator is a device used to separate and remove magnetic materials from a mixture or flow of substances. It utilizes the property of magnetism to attract and separate magnetic particles from non-magnetic materials. The magnetic separator typically consists of a stationary magnet with a magnetic field and a moving belt or drum that carries the material to be separated. When the mixture passes through the magnetic field, the magnetic particles are attracted to the magnet, while the non-magnetic particles continue their path. This process enables the effective separation and purification of materials in various industries, including mining, recycling, food processing, and manufacturing. Magnetic separators are designed in different configurations to suit specific applications, and they are crucial in facilitating the efficient sorting and purification of materials based on their magnetic properties.

The major global manufacturers of Magnetic Separator include Multotec, Pellenc, Bunting Magnetics, Outotec, SOLLAU, Brovind - GBV Impianti, Innovative Magnetic Technologies, Procma s.r.l., Eco-Spectrum LLC, Presona, HAMMEL Recyclingtechnik GmbH, Asgco, Greenex Eco, Eriez Manufacturing Co, LONGi Magnet, HUATE
