### Research Summary

Marine joysticks, also known as boat joysticks or marine control systems, are control devices used in marine vessels to maneuver and control the vessel's movement. These joysticks provide intuitive and convenient control over the vessel's propulsion, steering, and thruster systems. By moving the joystick in different directions, the operator can command the vessel to move forward, backward, sideways, or rotate in place. Marine joysticks often incorporate advanced technologies, such as electronic controls and hydraulic systems, to provide precise and responsive vessel handling. They are particularly popular in modern pleasure boats, luxury yachts, and commercial vessels, as they simplify docking, close-quarter maneuvering, and overall vessel control. The versatility and ease of use offered by marine joysticks make them a valuable tool for enhancing safety, maneuverability, and the overall boating experience.

The major global manufacturers of Marine Joysticks include Lilaas, JR Merritt, Althen, Volvo Penta, Cummins, ZF, SeaStar Solutions (Dometic), Yamaha, XENTA, Mercury Marine, Twin Disc, Yacht Controller, Evinrude, Brunvoll, Glendinning Products,
