Research Summary

Micronutrients are essential nutrients required by living organisms in relatively small quantities to support various physiological functions and maintain overall health. These nutrients include vitamins and minerals, such as iron, zinc, manganese, copper, iodine, selenium, and various vitamins like vitamin A, vitamin C, and vitamin D. While macronutrients like carbohydrates, proteins, and fats provide energy, micronutrients play crucial roles in supporting cellular functions, metabolism, growth, development, and proper functioning of the immune system. They act as cofactors or components of enzymes and are involved in numerous biochemical reactions. Micronutrients are typically obtained through a balanced diet that includes a diverse range of fruits, vegetables, whole grains, dairy products, and protein sources. Deficiencies or imbalances in micronutrients can lead to various health issues, and thus, maintaining adequate intake of these nutrients is important for optimal well-being.

The major global manufacturers of Micronutrient include BASF, AkzoNobel, Yara International, Haifa, Nutrien, Stoller, Mosaic, JR Simplot, Nulex, Sapec, Wolf Trax,
