Research Summary

Mineral spirits, also known as white spirits or mineral turpentine, are a petroleum-derived solvent commonly used in various industrial, commercial, and household applications. It is a clear, colorless liquid with a mild odor and is often used as a substitute for traditional paint thinners due to its ability to dissolve oil-based paints, varnishes, and other coatings. Mineral spirits are versatile solvents that can also be used for cleaning and degreasing surfaces, diluting oil-based paints and stains, and removing adhesive residues. They are less volatile than other solvents like acetone or lacquer thinner, making them safer to use in well-ventilated areas. Additionally, mineral spirits are relatively inexpensive and have a longer shelf life, making them a preferred choice for various solvent-based applications in industries such as automotive, woodworking, painting, and cleaning.

The major global manufacturers of Mineral Spirits include ExxonMobil, Shell Chemicals, Chevron Phillips Chemical, Sasol, LyondellBasell, Celanese, Warner Graham Company, Sunnyside Corporation, LEHVOSS Group, JAX INC., Sherwin-Williams, WM Barr, Gamblin, Solvable, etc. The global players competition landscape in this report is
