Research Summary

Monofilament fishing line is a type of fishing line made from a single strand of synthetic polymer material, typically nylon. It is designed specifically for fishing applications and is known for its versatility, strength, and invisibility underwater. Monofilament fishing line is available in various diameters and strengths to suit different fishing conditions and target species. It offers excellent knot strength, allowing anglers to secure their hooks and lures effectively. The smooth surface of monofilament line enables long and accurate casts, while its low visibility in water helps to reduce the chances of fish detecting the line. Monofilament also has a certain amount of stretch, which can help absorb shock during sudden movements or when fighting a fish, reducing the risk of the line breaking.

The major global manufacturers of Monofilament Fishing Line include PureFishing, Toray, Sufix International, Sunline, SHIMANO INC, DAIWA, Momoi, Maxima Fishing Line, Ultima, FirstDart, Ande Monofilament, FORTUNE, Mercan Fishing Lines, Far Bank Enterprises, Jarvis Walker, etc. The global players competition landscape in this report
