### Research Summary

A multi-functional printer, also known as an all-in-one printer, is a device that combines several essential office functions into a single unit. It typically integrates the functionalities of a printer, scanner, copier, and sometimes a fax machine. With a multi-functional printer, users can perform tasks like printing documents and images, scanning physical documents and converting them into digital files, making copies of documents, and sending or receiving faxes, all from a single device. These printers often come with additional features like automatic document feeding, duplex printing, wireless connectivity, and advanced software for managing and organizing scanned files.
