Research Summary

Natural antimicrobial agents are substances derived from natural sources that have the ability to inhibit or kill microorganisms, such as bacteria, fungi, viruses, and parasites. These agents can be obtained from plants, animals, and microorganisms, and they often possess inherent antimicrobial properties to protect against microbial growth and infection. Examples of natural antimicrobial agents include essential oils, plant extracts, herbs, spices, honey, propolis, and certain types of peptides. These natural compounds are known to exhibit antimicrobial activity through various mechanisms, including disruption of microbial cell membranes, interference with microbial enzymes, inhibition of microbial replication, and modulation of the immune system. Natural antimicrobial agents are of great interest in various applications, including food preservation, pharmaceuticals, personal care products, and the development of novel antimicrobial therapies, as they offer potential alternatives to synthetic antimicrobials and may provide benefits such as reduced toxicity and a lower likelihood of microbial resistance development.

The major global manufacturers of Natural Antimicrobial Agents include Ashland, DuPont Nutrition & Biosciences, Evonik, Chemipol, Evident Ingredients, Akema Fine Chemicals, SEPPIC, Active Micro Technologies, Sabinsa, Vedeqsa, Minasolve, Troy Corporation, Micro Science Tech, etc. The global players competition landscape in this report is divided into three tiers.
