Research Summary

Natural diacetyl is a naturally occurring compound found in certain foods and beverages. It is a volatile organic compound that is responsible for providing a buttery or creamy flavor and aroma. Natural diacetyl is produced during the fermentation process in various food products, particularly those that undergo bacterial fermentation such as dairy products like butter, yogurt, and cheese. It can also be found in fruits, vegetables, and alcoholic beverages like beer and wine. While naturally occurring, diacetyl has received attention due to its potential health risks when inhaled in large quantities, primarily in occupational settings such as microwave popcorn factories. Manufacturers are increasingly taking precautions to reduce diacetyl content in their products or use alternative flavoring ingredients to address these concerns.

The major global manufacturers of Natural Diacetyl include Illovo Sugar, Ernesto Vent?s, De Monchy Aromatics, Axxence Aromatic, Yancheng Hongtai Bioengineering, Beijing LYS Chemicals, Huade(Dancheng) Biological, Juye Zhongyue Perfume, etc. The global players competition landscape in this report is divided into three tiers.
