Research Summary

A neck pillow is a specially designed pillow that provides support and comfort to the neck and head while resting or sleeping. It is shaped to contour to the natural curvature of the neck, providing proper alignment and reducing strain on the neck muscles. Neck pillows are commonly used during travel, particularly on airplanes or during long car rides, to provide relief and prevent stiffness or soreness in the neck. They can also be used at home or in other settings to promote better sleep, especially for individuals who experience neck pain or have conditions like cervical spondylosis or whiplash. Neck pillows are usually made from soft and supportive materials, such as memory foam or inflatable designs, and often feature a contoured shape or a pillow with a neck roll to provide optimal support.
