Research Summary

A non-silicone release liner refers to a substrate material used in the manufacturing of pressure-sensitive adhesive products or labels that does not contain silicone coatings. Typically, release liners serve as a protective layer that allows for easy removal of the adhesive product or label from its backing material. Non-silicone release liners are commonly made from materials such as paper or film, coated with non-silicone release agents like specialized coatings or chemical treatments. These release liners offer an alternative option for applications where silicone-based liners may not be suitable due to concerns regarding the compatibility of the adhesive or specific end-use requirements. Non-silicone release liners can provide good release properties, controlled adhesion levels, and reliable performance, enabling optimal functionality for a wide range of adhesive products across various industries, including packaging, labeling, and industrial applications.

The major global manufacturers of Non-silicone Release Liner include Loparex, Lintec, 3M, Saint-Gobain, Siliconature, Oji F-Text, Fujiko, Mitsubishi Polyester, Formula,
