### Research Summary

Nursing pads, also known as breast pads or nursing bra pads, are absorbent pads worn inside a nursing bra or tank top to absorb breast milk leakage. They are designed to provide comfort and protection for breastfeeding mothers who may experience leakage between breastfeeding sessions or when their milk supply is established. Nursing pads come in two main types: disposable and reusable. Disposable nursing pads are made of absorbent materials and have an adhesive strip on the back to keep them in place. They are convenient for on-the-go use and can be thrown away after each use. Reusable nursing pads, on the other hand, are typically made of soft, breathable fabrics such as cotton or bamboo and can be washed and reused multiple times. They often have a waterproof backing to prevent leakage from soaking through clothing. Nursing pads provide a discreet way to manage milk leakage, helping to prevent wet spots on clothing and ensuring comfort and dryness for nursing mothers.

The major global manufacturers of Nursing Pads include Pigeon, NUK, Dacco, AVENT, LilyPadz Nursing Pads, Bamboobies, Ameda, Medela, CHUCHU, Dry Mama, Milkies, Lanacare, Ivory, Kaili, Rikang, Zhejiang Huilun, Piyo Piyo, Good Boy, etc. The global
