Research Summary

Nylon string trimmer line, often referred to as trimmer line or weed eater line, is a specialized cord used in string trimmers or weed eaters for cutting and trimming grass, weeds, and other vegetation. It is typically made from nylon, a durable and flexible synthetic polymer. The trimmer line is wound tightly onto a spool inside the trimmer head and extends out through a rotating head to cut through vegetation when the trimmer is in use. Nylon trimmer lines come in various thicknesses or diameters, ranging from lightweight for light-duty trimming to heavy-duty for tougher vegetation. They also come in different shapes, such as round, square, or twisted, each with its specific cutting characteristics. Nylon string trimmer lines are preferred because they are flexible, resistant to breaking, and have excellent cutting performance. They are capable of withstanding the high-speed rotation of the trimmer head and cutting through grass and weeds efficiently.

The major global manufacturers of Nylon String Trimmer Line include Speed, Mazzaferro, Rotary(Desert&Maxpower), Blount (Oregon), Yao I, Huaju Industrial,
