### Research Summary

An ozone disinfection machine, also known as an ozone generator, is a device that produces ozone gas (O<sub>3</sub>) for the purpose of disinfecting and sanitizing air, water, and surfaces. Ozone is a powerful oxidizing agent that can effectively eliminate bacteria, viruses, mold, and other microorganisms, as well as remove odors and organic contaminants. These machines work by generating ozone from oxygen or ambient air and dispersing it into the target environment. Ozone molecules interact with and neutralize pollutants or pathogens, breaking down their molecular structure. Ozone disinfection machines find applications in water treatment, air purification, food processing, and various industrial and healthcare settings, but they should be used with caution and in accordance with safety guidelines due to the potential health risks associated with ozone exposure in high concentrations.

The major global manufacturers of Ozone Disinfection Machine include Xylem, Ozonia, Mitsubishi Electric, Metawater, Sumitomo Precision Products, Ozono Elettronica Internazionale, ProMinent, Toshiba, Guolin, Fujian Newland EnTech, China LB Ozone,
