Research Summary

Packaged ice melter refers to a product designed to facilitate the removal of ice and snow from surfaces like sidewalks, driveways, and roads. It is typically available in various forms, such as granules, pellets, or flakes, and is often composed of chemical compounds like calcium chloride, sodium chloride (rock salt), magnesium chloride, or potassium chloride. When spread on icy or snowy surfaces, packaged ice melters work by lowering the freezing point of water, causing the ice and snow to melt at lower temperatures. These products are widely used in winter maintenance to enhance safety and prevent slip-and-fall accidents by improving traction on icy surfaces, especially in areas with cold climates and heavy snowfall. Proper application and adherence to safety guidelines are essential when using packaged ice melters, as some formulations can be harmful to vegetation and pets or may require protective measures during handling.

The major global manufacturers of Packaged Ice Melter include Compass Minerals, Cargill, Kissner, General Atomics, Green Earth Deicer Company, OxyChem, BCA
