Research Summary

Paint and coating strippers are chemical or mechanical agents used to remove old layers of paint, varnish, or coatings from various surfaces like wood, metal, or concrete. Chemical paint strippers typically come in the form of liquids, gels, or pastes and contain solvents or active ingredients that soften and lift the paint or coating for easy removal. Mechanical paint strippers, on the other hand, involve methods like sanding, scraping, or using heat to physically remove the layers. These products are valuable in renovation, restoration, and maintenance projects, allowing users to prepare surfaces for refinishing or to restore them to their original state. Safety precautions and appropriate protective gear are essential when working with paint and coating strippers, especially when handling chemical-based products, due to potential health and environmental risks associated with their use.

The major global manufacturers of Paint and Coating Stripper include Akzonobel, Fiberlock Technologies, Henkel, PPG Industries, 3M Company, Rust-Oleum, Kimetsan, Barr Brands International, Dumond, Savogran, Recochem, Sunnyside, etc. The global
