### Research Summary

Painting masking tape, often referred to as painter's tape, is a type of adhesive tape designed for temporary masking and protecting surfaces during painting and finishing tasks. It is typically made of paper or a combination of paper and adhesive, and it features low-tack adhesive properties that allow it to adhere securely to surfaces without leaving behind residue or damaging the finish. Painter's tape is used to create clean and sharp lines when painting walls, trim, and other surfaces, serving as a barrier to prevent paint from bleeding onto adjacent areas. It is available in various widths and can be easily applied and removed, making it an essential tool for achieving professional and precise paint jobs while minimizing the need for time-consuming touch-ups.
