### Research Summary

Paragliders are lightweight, foot-launched, non-motorized gliding aircraft that consist of a fabric wing with an inflatable structure and a harness for the pilot. These recreational flying devices are designed for gliding and soaring through the air using the natural forces of wind and thermals. Paragliders allow pilots to navigate the skies, steering and controlling their flight by shifting their body weight and manipulating the wing's control lines. They offer a serene and relatively slow-paced form of aviation, popular for both recreational and competitive flying. Paragliding provides an exhilarating way to experience the thrill of free flight and enjoy breathtaking aerial views, making it a popular adventure sport in many parts of the world.

The major global manufacturers of Paragliders include Advance Thun, NOVA Performance Paragliders, Sky Paragliders, Bruce Goldsmith Design, GIN Gliders, Skywalk, Dudek Paragliders, Mac Para, UP International, Axis, Ozone Paragliders, NZ Aerosports, ICARO Paragliders, U-TURN, Independence Paragliding, ITV Parapentes, Avic Hongguang, etc. The global players competition landscape in this report is divided
