Research Summary

Parking deck coating is a protective and functional material applied to parking structures, such as parking garages or decks, to enhance their durability and longevity. These coatings are designed to provide a protective barrier against various environmental factors, including moisture, chemicals, abrasion, and UV exposure, which can cause deterioration and damage to the concrete or structural materials of the parking deck. Parking deck coatings not only extend the life of the structure but also improve safety by providing slip resistance for vehicles and pedestrians. They come in various formulations, including epoxy, polyurethane, or hybrid systems, and are typically applied in multiple layers to create a seamless, impermeable surface that can withstand the heavy traffic and exposure to harsh conditions that parking decks endure.

The major global manufacturers of Parking Deck Coating include Sika, Tremco Incorporated, BASF, MAPEI, Stonhard, Tennant Coatings, etc. The global players competition landscape in this report is divided into three tiers.
