Research Summary

Passenger car motor oil, often referred to as engine oil or automotive lubricant, is a specialized oil designed for use in the engines of passenger vehicles, such as cars and light trucks. It serves as a crucial component for engine maintenance, providing lubrication, cooling, and protection for the engine's moving parts. Passenger car motor oil is formulated to minimize friction and wear, dissipate heat generated during combustion, and prevent the accumulation of harmful deposits in the engine. It comes in different grades and viscosities, with classifications like 5W-30, 10W-40, and 0W-20, to match the specific requirements of various engine types, climates, and driving conditions. Routine oil changes with the appropriate passenger car motor oil are essential for the longevity and optimal performance of a vehicle's engine.
