Research Summary

PCR PET (Polyethylene Terephthalate) film refers to a type of plastic film made from recycled PET material. PET is a commonly used thermoplastic polymer known for its transparency, strength, and resistance to moisture and chemicals. PCR PET film is produced by recycling post-consumer PET plastic, such as bottles and packaging materials, and transforming it into a new material. This sustainable approach helps reduce waste and environmental impact by reusing existing plastics. PCR PET film is utilized in various applications, including packaging, labels, and protective films, offering similar characteristics to virgin PET while promoting eco-friendliness and circular economy practices by incorporating recycled materials into new products.

The major global manufacturers of PCR PET Film include Sumilon Polyester, Kolon, Mitsubishi Polyester Film, Toray Plastics, Klockner Pentaplast, Polyplex, Camvac, Toyobo, Now Plastics, FlexFilms, etc. The global players competition landscape in this report is divided into three tiers.
