Research Summary

PCTG, or Polycyclohexylenedimethylene Terephthalate Glycol, is a type of thermoplastic polymer that belongs to the family of polyesters. PCTG is known for its exceptional clarity, high impact resistance, and good chemical resistance. It is commonly used in applications where transparency and toughness are important, such as in the production of clear and durable plastic containers, including water bottles, food storage containers, and medical devices. PCTG's resistance to impact and chemicals, along with its ability to maintain clarity over time, make it a popular choice in various industries, particularly for products that require a combination of aesthetic appeal and strength.

The major global manufacturers of PCTG include Eastman, SK Chemical, etc. The global players competition landscape in this report is divided into three tiers.
