### Research Summary

Pectinase is a group of enzymes that are primarily responsible for the breakdown of pectin, a complex carbohydrate found in the cell walls of plants, particularly in fruits. These enzymes are produced by various microorganisms, such as bacteria, fungi, and yeast, and they play a crucial role in various industrial processes, including food and beverage production. Pectinase enzymes are widely used in the food industry for tasks like fruit juice extraction, where they help release and clarify the juice by breaking down pectin, improving the yield and quality of the final product. They are also employed in winemaking to aid in the maceration of grapes, as well as in the brewing industry and the production of various food products, such as jams, jellies, and canned fruits. Pectinase enzymes are valuable tools for enhancing the efficiency of various processes and ensuring the desired texture and quality of food and beverage products.

The major global manufacturers of Pectinase include Novozymes, DuPont, DSM, AB Enzymes, Vland Biotech, VTR Bio-Tech, Shandong Longda, Advanced Enzymes, Enartis, CJ Youtell, Sukahan Bio-Technology, Doing-Higher, Antozyme Biotech, Creative Enzymes, etc. The global players competition landscape in this report is
