Research Summary

Pentylene glycol is a clear, colorless liquid organic compound used primarily as a solvent, moisturizer, and preservative in various cosmetic and skincare products. It belongs to the class of glycols and is often derived from renewable sources such as corn, rice, or sugar cane. Pentylene glycol is valued for its ability to help hydrate the skin by attracting and retaining moisture, making it a common ingredient in moisturizers, serums, and lotions. Additionally, it serves as a solvent, helping to dissolve other ingredients in cosmetic formulations and improve their texture and spreadability. Its antimicrobial properties also make it a popular choice as a preservative, helping to extend the shelf life of skincare products by inhibiting the growth of bacteria and fungi. Due to its mild and non-irritating nature, pentylene glycol is suitable for use in a wide range of skincare and cosmetic formulations, including those designed for sensitive skin.

The major global manufacturers of Pentylene Glycol include BASF, Evonik, Lanxess, Minasolve, Symrise, Kokyu Alcohol Kogyo, Ashland, Thor Personal Care, Jujing
