Pepper spray, also known as OC spray (Oleoresin Capsicum), is a non-lethal self-defense tool designed to incapacitate and deter potential threats. It contains a concentrated extract from chili peppers that irritates the eyes, respiratory system, and skin, causing temporary discomfort, pain, and inflammation. When sprayed in the face of an aggressor, pepper spray can cause temporary blindness, coughing, and intense burning sensations, which incapacitate the individual and create an opportunity for escape or self-defense. Pepper sprays are commonly used by law enforcement, security personnel, and individuals for personal safety and protection against assailants or aggressive animals.
