Research Summary

Permanent modular buildings are structures constructed using prefabricated modules or components in a controlled off-site environment. These modules are manufactured and assembled in a factory before being transported to the construction site for final assembly. By adhering to building codes and quality standards, these buildings are designed to function and look like traditionally constructed buildings but with the added advantages of accelerated construction, reduced material waste, and improved cost efficiency. These structures are commonly used for a range of applications, including schools, offices, residential buildings, and healthcare facilities, offering flexibility, sustainability, and faster project delivery compared to traditional on-site construction methods.

The major global manufacturers of Permanent Modular Building include Clayton Homes, Skyline Champion Corporation, Cavco Industries, Dexterra Group, Atco, Dvele, Black Diamond Group, Blazer Industries, Icon Legacy Custom Modular Homes, Silver Creek Industries, Whitley Manufacturing, Westchester Modular Homes, Plant Prefab, Modern
