### Research Summary

A pesticide synergist agent is a chemical added to pesticides to enhance their effectiveness by improving the action or potency of the active ingredients in the pesticide. These agents are not directly toxic to pests but work by boosting the pesticidal properties of the primary active ingredients. Commonly used in combination with insecticides or other pest control products, they act by either enhancing the penetration of the active ingredients into the pest, inhibiting enzymes that break down the pesticide, or disrupting the pest's defense mechanisms. Synergists can contribute to more effective pest control by increasing the impact of the primary pesticides, thus reducing the amount of active ingredients needed and potentially minimizing the development of pest resistance to the chemicals.

The major global manufacturers of Pesticide Synergist Agent include Terminix, Rollins, Rentokil Initial, Anticimex, Killgerm, Ecolab, Massey Services, Bayer Advanced, BASF, Syngenta, Harris, Spectrum Brands, SC Johnson, etc. The global players competition landscape in this report is divided into three tiers.
