By 2025, China's market size is expected to be Million USD, representing approximately % of the global market share.

Research Summary

pH test strips are simple, paper or plastic strips impregnated with a pH-sensitive indicator that changes color based on the acidity or alkalinity of a solution. These strips are widely used for quick and qualitative pH measurements in various applications, such as in laboratories, educational settings, home testing, and industrial processes. To use them, a small portion of the strip is dipped into the solution, and the resulting color change is matched against a provided color chart to determine the pH level. While pH test strips offer a rapid and cost-effective method for approximate pH assessments, they are generally less precise than electronic pH meters and are well-suited for applications where precision is not critical, and a qualitative indication of pH is sufficient.

The major global manufacturers of pH Test Strips include VWR Chemicals, Merck, MACHEREY-NAGEL, GE Healthcare, Ahlstrom-Munksjo, Camlab, Fisher Scientific, Precision Laboratories, LabRat Supplies, Johnson Test Papers, Micro Essential Laboratory, etc. The global players competition landscape in this report is divided into three tiers.
