Research Summary

A polycarbonate panel is a transparent or translucent building material made from polycarbonate, a durable thermoplastic polymer known for its optical clarity, impact resistance, and versatility. These panels are widely used in construction and architecture to provide natural light, insulation, and aesthetic appeal to structures. The panels come in various forms, including multi-wall sheets, solid sheets, and corrugated panels, each offering different benefits such as thermal insulation, UV resistance, and high light transmission. Polycarbonate panels are commonly employed in applications such as roofing, skylights, greenhouses, and wall cladding. Their lightweight nature, along with the ability to resist breakage and extreme weather conditions, makes them a popular choice for both residential and commercial projects where durability and natural light transmission are essential considerations.

The major global manufacturers of Polycarbonate Panel include Sabic, Covestro, Palram Industries, UG-Plast, Plazit Polygal, Gallina, Verzatec Group, Brett Martin, Carboglass, SafPlast, Arla Plast, Giplast, Corplex, Isik Plastik, Aoci Decoration Material,
