Research Summary

A polycarbonate sheet is a versatile and transparent plastic material made from polycarbonate resin, known for its exceptional strength, impact resistance, and optical clarity. These sheets are commonly used in construction, glazing, and fabrication applications due to their lightweight nature and high impact strength compared to glass. Polycarbonate sheets are available in various forms, including multi-wall sheets, solid sheets, and corrugated panels. They provide excellent insulation properties and can transmit a high percentage of natural light while blocking harmful UV radiation. The sheets are popular choices for applications such as roofing, skylights, greenhouse panels, and protective barriers. Their durability, flexibility, and resistance to extreme weather conditions make them suitable for both residential and commercial projects where a combination of transparency and robustness is required.

The major global manufacturers of Polycarbonate Sheet include Sabic, Covestro, Palram Industries, UG-Plast, Plazit Polygal, Gallina, Koscon Industrial, Brett Martin, Carboglass, SafPlast, Arla Plast AB, Giplast, DS Smith, Isik Plastik, Aoci Decoration
