### Research Summary

Polyimide tubing is a type of tubing made from polyimide, a high-performance polymer known for its exceptional thermal stability, mechanical strength, and chemical resistance. Polyimide tubing exhibits excellent dimensional stability over a wide temperature range, making it suitable for applications in industries such as aerospace, electronics, and medical devices. Its ability to withstand extreme temperatures and harsh environmental conditions makes it valuable for various purposes, including as insulating material in electronic components, protective sheathing for wires and cables, and tubing for fluid transport in demanding applications. Polyimide tubing is known for its flexibility, low outgassing properties, and resistance to abrasion. These characteristics contribute to its use in situations where traditional tubing materials might not provide the required performance.

The major global manufacturers of Polyimide Tubing include Furukawa Electric, MicroLumen, Nordson MEDICAL, HPC Medical Products, Putnam Plastics, Elektrisola, Zeus, Shenzhen D.soar Green, Huizhou Fusheng Insulation Materials, etc. The global
