Research Summary

Post-consumer yarns, also known as recycled yarns, are textile materials made from fibers derived from used or discarded consumer products, such as clothing, textiles, or other post-consumer waste. The recycling process involves collecting, cleaning, and processing these materials to create new yarns for use in textile and apparel production. By repurposing post-consumer waste into yarn, manufacturers contribute to sustainable and eco-friendly practices, reducing the demand for virgin fibers and minimizing environmental impact. This recycling approach aligns with the principles of a circular economy, promoting resource efficiency and waste reduction in the textile industry. Post-consumer yarns find applications in various textile products, including clothing, accessories, and home furnishings, providing a more environmentally conscious alternative to traditional yarn production methods.
