### Research Summary

A Preclinical Contract Research Organization (CRO) is a specialized service provider in the pharmaceutical and biotechnology industry that conducts preclinical studies on behalf of drug development companies. Preclinical studies are a crucial phase in drug development, occurring before human clinical trials. Preclinical CROs offer a range of services, including in vitro and in vivo testing, toxicology studies, pharmacokinetics assessments, and other evaluations of a drug candidate's safety and efficacy. These organizations have the expertise, facilities, and regulatory knowledge to conduct preclinical research in compliance with industry standards and regulatory requirements. By outsourcing preclinical studies to CROs, drug developers can benefit from specialized resources, accelerate the drug development timeline, and make informed decisions about the advancement of their compounds into clinical trials.

The major global manufacturers of Preclinical CRO include Charles River, Wuxi AppTec, Labcorp, Eurofins Scientific, PPD, Pharmaron, ICON, Inotiv, ChemPartner, JOINN Lab, Medicilon, EVOTEC, Crown Bioscience, Champion Oncology, etc. The
