Research Summary

Processed food refers to any food item that has undergone alteration from its original state through various methods of preparation, preservation, or modification. Processing can involve techniques such as cooking, canning, freezing, drying, and the addition of preservatives, flavor enhancers, or other ingredients to improve taste, texture, or shelf life. Processed foods range from minimally processed items like bagged salads or frozen vegetables to highly processed products such as ready-to-eat meals, snacks, and sugary beverages. While processing can offer convenience and extend the shelf life of food, it often involves the addition of ingredients that may contribute to concerns about nutritional quality, including added sugars, salt, and preservatives. Consumers are encouraged to read food labels carefully and make informed choices to maintain a balanced and healthy diet.

The major global manufacturers of Processed Food include Nestle, Tyson Foods, JBS Foods, Mars, PepsiCo, Kraft Heinz, Mondelez International, WH Group, General Mills, Kellogg's, Hormel Foods, Cargill, ConAgra, Saputo, Maple Leaf Foods, COFCO, etc.
