### Research Summary

A public electric vehicle (EV) charger is a charging station made available for public use, allowing electric vehicle owners to recharge their cars' batteries at various locations, such as parking lots, streets, shopping centers, and highways. These chargers are typically equipped with different charging connectors, compatible with various EV models, and may support multiple charging standards like Level 2 (AC) or DC fast charging (Level 3). Public EV chargers are essential for the widespread adoption of electric vehicles, offering convenience for drivers who may not have access to home charging infrastructure. They are often integrated into networks that provide real-time availability information, payment systems, and mobile apps for easy access.
