Research Summary

Pulse lavage systems are medical devices used in wound care and surgical procedures to irrigate and cleanse wounds thoroughly. These systems typically consist of a handheld device connected to a pump that delivers a pulsating stream of sterile saline or other irrigating solutions. The pulsating action helps dislodge debris, bacteria, and contaminants from the wound, promoting effective cleansing and reducing the risk of infection. Pulse lavage systems are commonly employed in orthopedic and trauma surgeries, where they aid in the removal of blood clots, tissue fragments, and bacteria from surgical sites. The controlled and targeted irrigation provided by these systems allows healthcare professionals to maintain a clean and optimal environment for wound healing. Pulse lavage systems contribute to improved postoperative outcomes by facilitating a more thorough and efficient wound irrigation process.

The major global manufacturers of Pulse Lavage Systems include Zimmer, Mahe Medical, BD, Smith & Nephew, Molnlycke, Heraeus, De Soutter Medical, MicroAire Surgical Instruments, Clean Medical, etc. The global players competition landscape in
