Research Summary

Pure cashmere refers to a luxurious and high-quality type of wool obtained from the fine, soft fibers of the cashmere goat. This natural fiber is renowned for its exceptional softness, lightweight feel, and excellent insulation properties. The cashmere goat, often found in regions like Mongolia, China, and parts of Central Asia, produces a dense and downy undercoat that is carefully combed or sheared during the spring molting season. The collected fibers are then processed to remove coarse hairs and impurities, leaving behind the ultra-fine and silky cashmere fibers. Pure cashmere is highly sought after in the textile and fashion industry for crafting premium-quality garments, including sweaters, scarves, and shawls. Its rarity, coupled with the meticulous production process, contributes to the relatively higher cost of pure cashmere products compared to other types of wool. Garments made from pure cashmere are prized for their luxurious feel, warmth, and timeless elegance.

The major global manufacturers of Pure Cashmere include Gobi, GOYO, Cashmere Holding, Sor Cashmere, Erdos, Kingdeer, Viction Cashmere, Dongrong, Ningxia St.Edenweiss, Tianshan Wool, etc. The global players competition landscape in this
