### Research Summary

A push rod camera is a specialized inspection tool used in plumbing, pipeline, and industrial maintenance to visually assess the condition of inaccessible or hard-to-reach spaces. Consisting of a compact camera mounted on the end of a flexible rod, the system is designed to be pushed or fed into pipes, conduits, or ducts. The push rod camera transmits real-time video footage to a monitor, enabling operators to observe and identify issues such as blockages, leaks, or structural damage. These cameras are particularly useful in situations where traditional inspections would be challenging or impractical. The flexibility of the push rod allows it to navigate through bends and turns, providing a cost-effective and non-destructive means of evaluating the interior condition of pipelines and confined spaces. This technology is widely employed in plumbing inspections, sewer maintenance, and industrial facilities to diagnose and address potential problems promptly.

The major global manufacturers of Push Rod Camera include iPEK International, Pearpoint, Envirotech Industries, AM Industrial, MiniCam, Dart System, Troglotech, Camtronics, Heisenberg, Shenzhen BOJ, Rausch, Kummert, Mini-Cam Ltd, Wohler
