### Research Summary

Radiation protection glass, also known as lead glass or radiation shielding glass, is a specialized type of glass designed to provide shielding against ionizing radiation. It contains lead oxide as a key component, which effectively absorbs and attenuates X-rays and gamma rays, reducing the risk of radiation exposure to individuals on the other side of the glass. This type of glass is commonly used in medical facilities, laboratories, and industrial settings where diagnostic imaging, radiation therapy, or nuclear medicine procedures are conducted. Radiation protection glass allows for clear visibility while maintaining a high level of safety for operators and observers, making it an essential component in the construction of viewing windows and barriers in environments where radiation-producing equipment is utilized.

The major global manufacturers of Radiation Protection Glass include AADCO Medica, Aktif X-ray, BIODEX, Cablas, Capintec, Electric Glass Building Materials, Infab Corporation, Lemer Pax, MAVIG, Protech Medical, Wardray Premise, Wolf X-Ray Corporation, etc. The global players competition landscape in this report is divided into
